- 2 Congress finds the following:
- 3 Hundreds of civilians, including many 4 United States citizens, are working with the military 5 and police forces of the Republic of Colombia and 6 other countries of the Andean region under con-7 tracts between the United States Government and 8 several private corporations. The duties of such indi-9 viduals include piloting drug-crop fumigation air-10 craft, flying helicopters transporting army battalions, serving as mechanics and logistics personnel, 12 assisting the reform of the security forces, performing armed search-and-rescue missions, 13 and 14 gathering aerial intelligence, among others.
  - (2) On February 18, 2001, United States contractor personnel on a search-and-rescue mission in the guerrilla-held zone of Curillo, in Colombia's Caquetá region, were involved in an exchange of fire with members of Colombia's FARC guerrilla groups, raising concerns about force protection and proximity to Colombia's conflict.
  - (3) According to the Inspector General of the Department of State, three United States contract personnel have died while piloting spray planes over Colombian territory since 1997.

- 1 (4) Contract personnel are being employed in 2 circumstances and locations in Colombia which, for 3 force protection reasons, would generally be off-lim-4 its to uniformed United States personnel.
  - (5) Increasing use of private contract personnel raises questions of accountability and transparency in the management of United States policy toward Colombia and other countries of the Andean region.
  - (6) On April 20, 2001, a plane operated by innocent United States civilians conducting missionary work was shot down in the airspace of the Republic of Peru. The plane was targeted as a result of intelligence sharing between Central Intelligence Agency-contracted private military personnel and Peruvian authorities. As a result, Veronica "Roni" Bowers, age 35, and her 7-month old daughter Charity were killed.
  - (7) Basic information about the extent of activities of private military contractors in Colombia and in other countries of the Andean region is generally unavailable to the public.
